

Shaped by Structures

[Verse]

Tall and mighty towers rise
Glass and steel touch the skies
Bridges span the river wide
Arches where the hearts reside

[Verse 2]

Square and solid walls so strong
Curves that snake and stretch along
Domes that kiss the heaven's blue
Streets that twist and turn anew

[Chorus]

Shapes of wonder all around
In our cities they are found
Angles sharp and curves that flow
Everywhere you chance to go

[Bridge]

Columns holding up the weight
Windows where the light escapes
Pillars pointing to the stars
Every shape tells who we are

[Verse 3]

Bricks and beams in harmony
Concrete crafted carefully
Triangles in a row
Lines that lead us where to go

[Chorus]

Shapes of wonder all around
In our cities they are found
Angles sharp and curves that flow
Everywhere you chance to go
